

Procedure for Student Grade Appeals

Dear students, please be informed that it is important to review the grades recorded in the ***Hamava System*** at the conclusion of each semester or clinical internship period.

Following the initial grade submission, students have a three-day window to present their written objections by visiting the educational department's office.

It is essential to note that after the final grade submission (two weeks after the initial registration) and transmission to the university, in accordance with Article 35 of the educational regulations, no further grade appeals or changes will be considered valid.
